

Rebecca Rimert, RN

Experienced Registered Nurse

Clinical Education Manager, VitalGo Systems

Email: becky@vitalgosys.com

Phone: 636-345-3065

With over 20 years of experience as a registered nurse, Becky has dedicated her career to critical care excellence, specializing in ICU patient management and advanced clinical training. Throughout her career, Becky has provided exceptional care all along the continuum of care, including in high-acuity environments, working with complex patient populations, including those requiring mechanical circulatory support and advanced respiratory interventions.

As a recognized expert in the clinical application of the Total Lift Bed, Becky has become a trusted resource for hospitals and healthcare teams seeking to improve patient outcomes through early mobilization and fall prevention strategies. Her extensive experience in ICU settings gives her a unique perspective on integrating mobility solutions into patient care plans, ensuring optimal recovery and improved quality of life.

Becky is passionate about empowering healthcare professionals through education and hands-on training, bridging the gap between technology and clinical practice. She has led numerous training programs across hospitals, equipping nursing staff with the skills and confidence needed to implement verticalization therapy effectively and safely.

Committed to advancing patient-centered care, Becky continues to drive best practices in mobility, critical care nursing, and innovative healthcare solutions. Her leadership and expertise make her an invaluable asset to clinical teams striving for excellence in ICU care.
